

Student Enrollment & Course Management System (SECMS)

Phase 2 – Requirement Analysis
Built on the Salesforce Platform

Project	Details
Project Name	Student Enrollment & Course Management System (SECMS)
Platform	Salesforce (Lightning Experience, Developer Edition)
Team Member	Member 1: Vasanthakumar R Team Lead Member 2: Saravanan V Member 3: Syed Kutbudeen S Member 4: Raji P Member 5: Sriram S
Phase	2 of 8 – Requirement Analysis

1. Introduction

This document lists what SECMS must do (functional requirements), how well it must do it (non-functional requirements), who uses it, and the data it must store. It is the base for the design, development and testing phases.

2. Stakeholders / User Roles

Role	Description	Access Level
System Administrator	Manages the org, objects, security and approvals	Full access
Admin / Office Staff	Creates and maintains student, course and enrollment records	Create, read, edit
Instructor	Views assigned courses and enrolled students	Read only (own courses)
Management / HOD	Views reports and dashboards	Read only (reports)

3. Functional Requirements

Category	Requirement
Security	Role-based access; only authorized users can view or edit records
Usability	Simple Lightning UI with clear tabs and page layouts

ID	Requirement	Priority
----	-------------	----------

FR-01	Store student details (name, email, phone, department, status)	High
FR-02	Store course details (name, code, fee, seats, duration)	High
FR-03	Store instructor details and assign an instructor to a course	High
FR-04	Enroll a student in a course through an Enrollment record	High
FR-05	Record payments against an enrollment (amount, date, status)	High
FR-06	Validate data using validation rules (required fields, valid values)	High
FR-07	Route enrollments through an approval process	High
FR-08	Automate status updates and notifications using Flow	Medium
FR-09	Provide reports (enrollments by course, payment status, student list)	Medium
FR-10	Provide a dashboard with key enrollment and payment metrics	Medium
FR-11	Provide a Lightning app with tabs for every object	Medium
FR-12	Restrict access using profiles, roles and permission sets	High

4. Non-Functional Requirements

Category	Requirement
Reliability	Hosted on Salesforce cloud with high availability
Performance	Records and reports load within a few seconds
Data Integrity	Validation rules and relationships prevent invalid or orphan records
Scalability	Can handle more students and courses without redesign

5. Data Requirements

Object	Key Fields	Relationship
Student	Name, Email, Phone, Department, Status	Parent of Enrollment
Course	Course Name, Code, Fee, Seats, Duration	Parent of Enrollment; linked to Instructor
Instructor	Name, Email, Department	Linked to Course
Enrollment	Student, Course, Enrollment Date, Status	Junction between Student and Course
Payment	Enrollment, Amount, Payment Date, Status	Child of Enrollment

Use Case	Actor	Outcome
Register Student	Admin	Student record created

Manage Course	Admin	Course created or updated
---------------	-------	---------------------------

6. User Stories

ID	As a...	I want to...	So that...
US-01	Admin	register a new student	student data is stored centrally
US-02	Admin	create and update courses	students can choose available courses
US-03	Admin	assign an instructor to a course	classes are properly staffed
US-04	Admin	enroll a student in a course	enrollment is recorded digitally
US-05	Admin	record a payment for an enrollment	fee status is tracked
US-06	Administrator	approve or reject enrollments	only valid enrollments are confirmed
US-07	Instructor	see students enrolled in my course	I know my class list
US-08	HOD	view dashboards and reports	I can make decisions from live data

7. Use Case Summary

Use Case	Actor	Outcome
Enroll Student	Admin	Enrollment created and sent for approval
Approve Enrollment	Administrator	Enrollment confirmed or rejected
Record Payment	Admin	Payment linked to enrollment
View Reports / Dashboard	HOD, Admin	Real-time metrics displayed

8. Technology Requirements

- **Platform:** Salesforce Developer Edition (Lightning Experience)
- **Declarative tools:** Objects, Fields, Page Layouts, Validation Rules, Flow, Approval Process
- **Analytics:** Reports and Dashboards
- **Access:** Any modern web browser with internet connection

9. Assumptions and Constraints

- The project uses only free Salesforce Developer Edition features.
- Payments are recorded manually; no external payment gateway is integrated.
- Users have a stable internet connection and a modern browser.
- Data volume is limited to the Developer Edition storage limits.
