

SECMS

Student Enrollment & Course Management System
Built on the Salesforce Platform

Phase 5: Project Development

Project Name	SECMS
Platform	Salesforce Developer Edition (Lightning Experience)
Phase	5 of 8 - Project Development
Team Name / Members	Member 1: Vasanthakumar R Team Lead Member 2: Saravanan V Member 3: Syed Kutbudeen S Member 4: Raji P Member 5: Sriram S

1. Overview

This phase documents how SECMS was built in Salesforce using declarative (no-code) tools. Each step below includes a description and a screenshot from the org.

2. Development Steps

Step	Activity	Salesforce Tool
1	Create custom objects: Student, Course, Instructor, Enrollment	Object Manager
2	Add fields and relationships (Text Area, Lookup, etc.)	Fields & Relationships
3	Create the Student Enrollment Lightning app	App Manager
4	Add validation rule for institutional student email	Validation Rules
5	Automate enrollment with 5 record-triggered flows	Flow Builder
6	Configure approval process for enrollment requests	Approval Processes
7	Create reports: New Students, New Enrollments, Fees Paid	Reports
8	Create Student Management Dashboard	Dashboards

3. Implementation Details

3.1 Custom Objects

Four custom objects were created in Object Manager: Student, Course, Instructor and Enrollment.

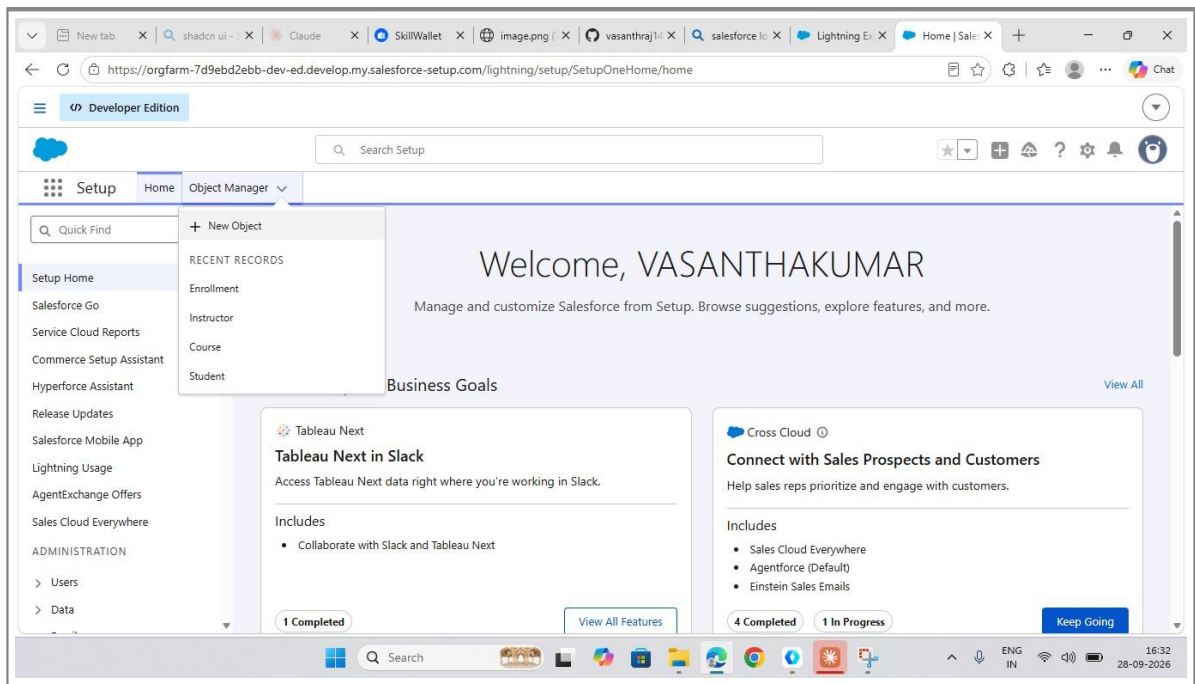

Figure 1: Custom objects in Object Manager

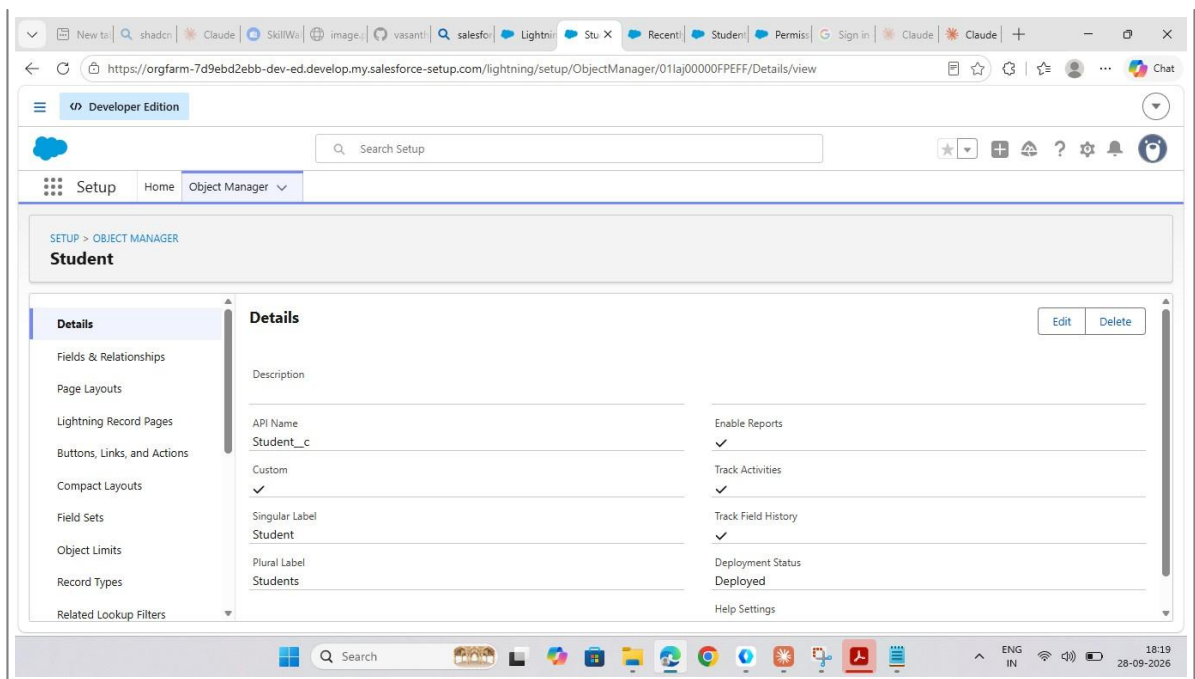

Figure 2: Student object details (Student__c, deployed)

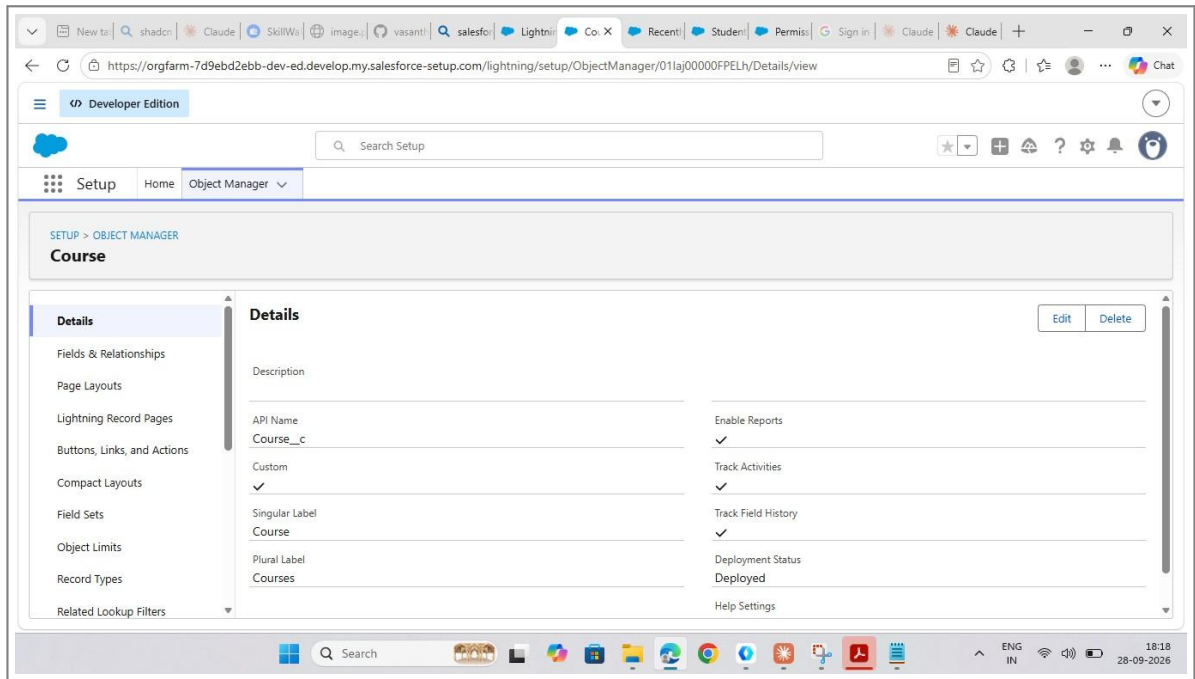

Figure 3: Course object details (Course__c, deployed)

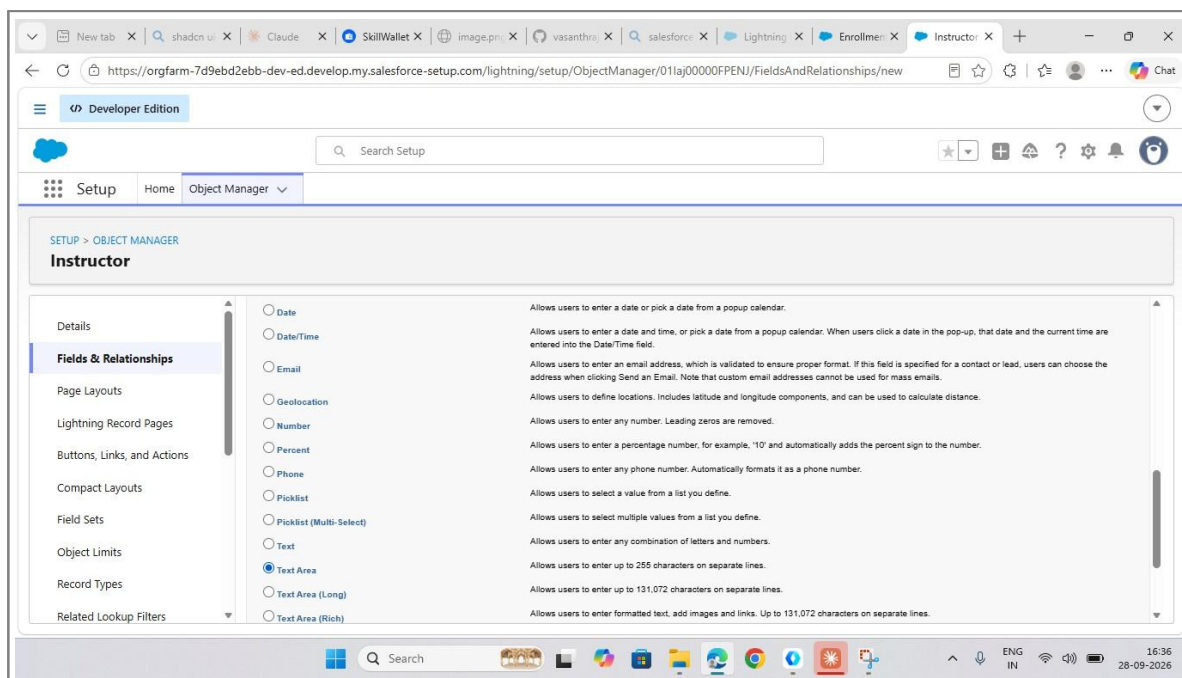

Figure 4: Instructor object details (Instructor__c, deployed)

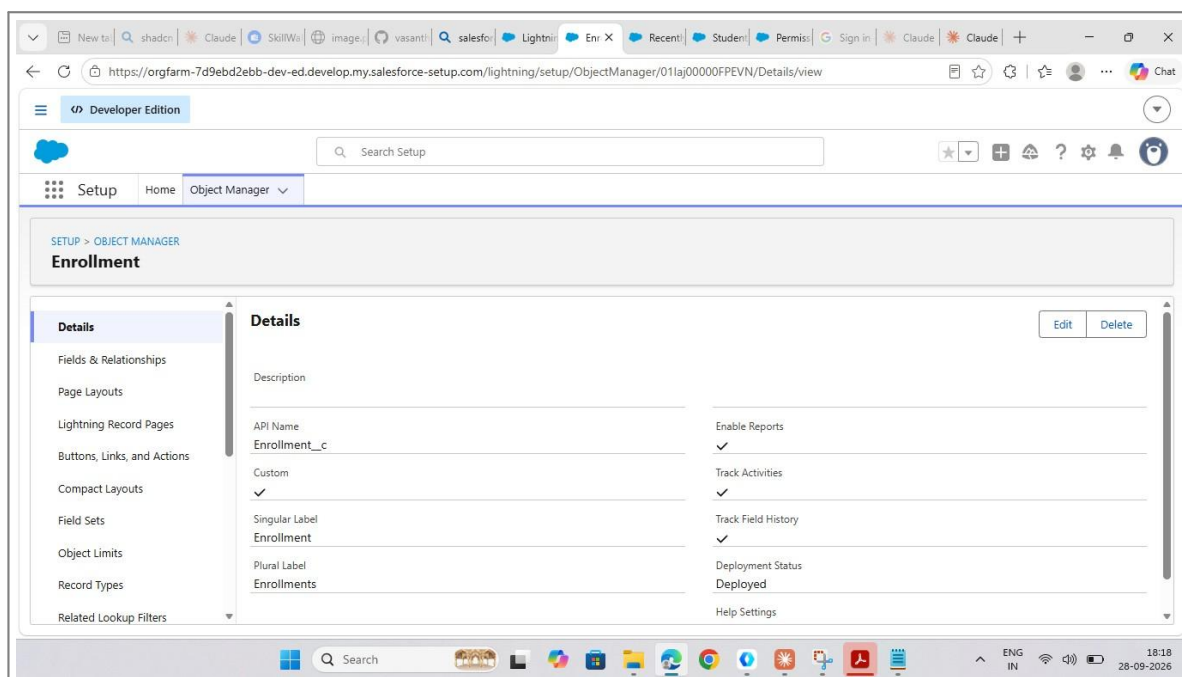

Figure 5: Enrollment object details (Enrollment__c, deployed)

3.2 Fields and Relationships

Fields were added to each object, and Lookup relationships link Enrollment with Student, Course and Instructor.

Figure 6: Creating a new field on the Instructor object (Text Area)

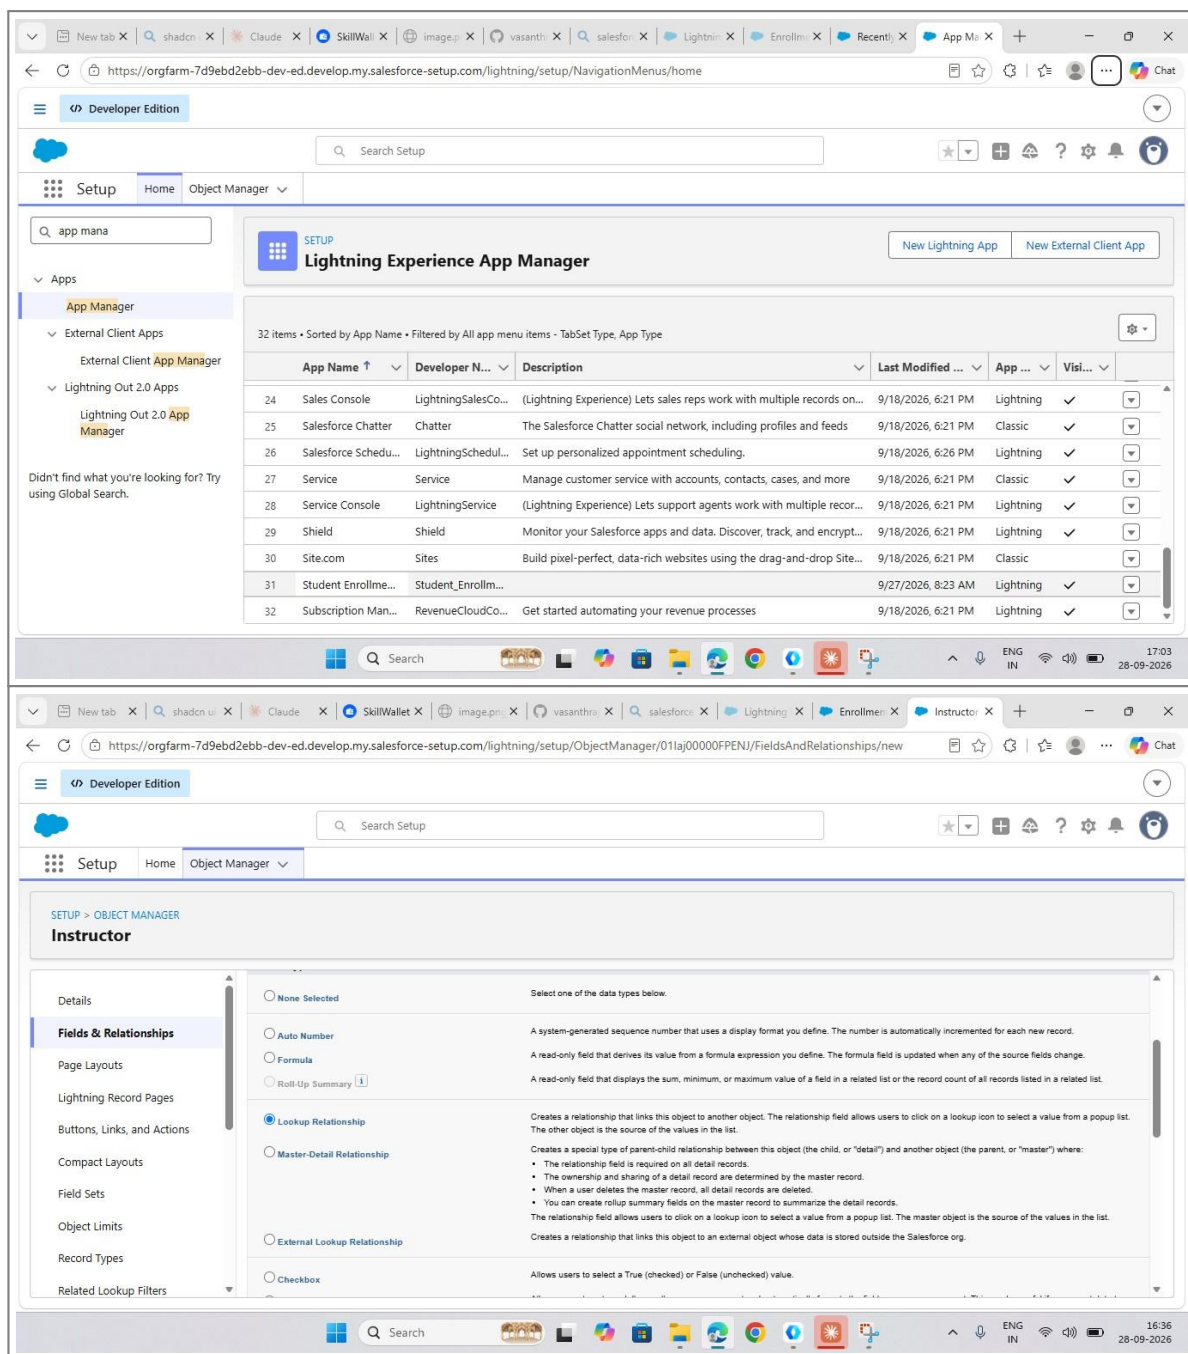

Figure 7: Selecting Lookup Relationship as the field type

3.3 Lightning App

Figure 8: Student Enrollment app created in App Manager

3.4 Validation Rule

Student_Email_Domain_Validation shows the error "Email must be a valid student institutional email." on the Email field.

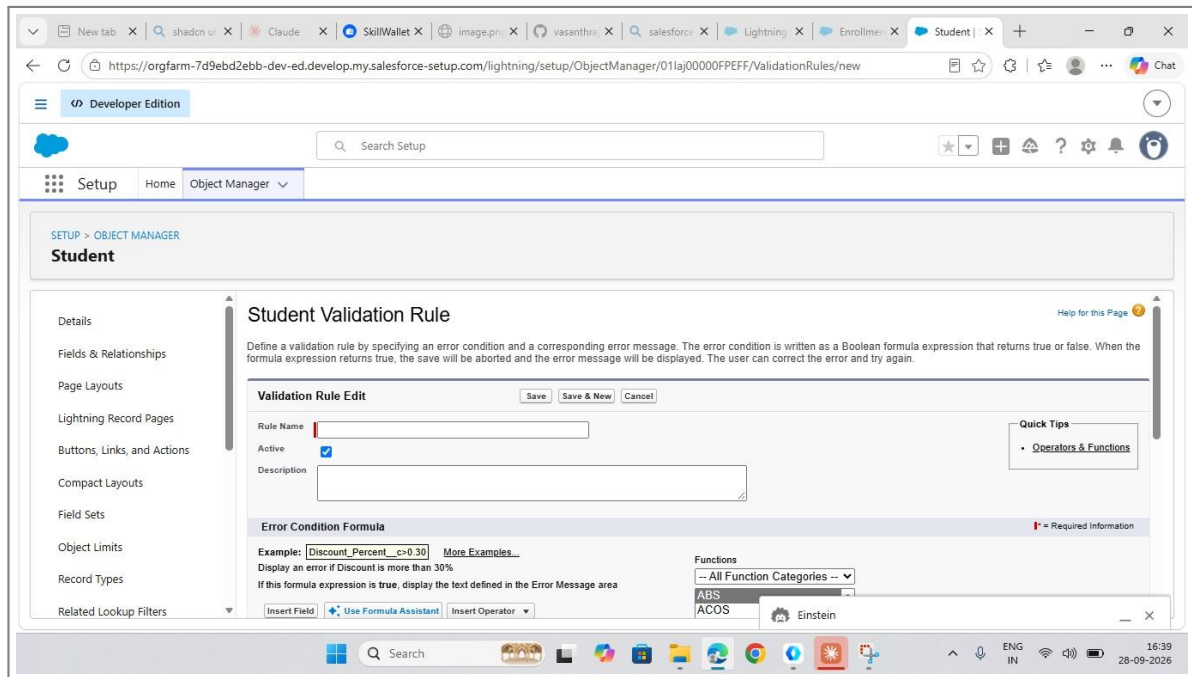

Figure 9: Creating a new validation rule on the Student object

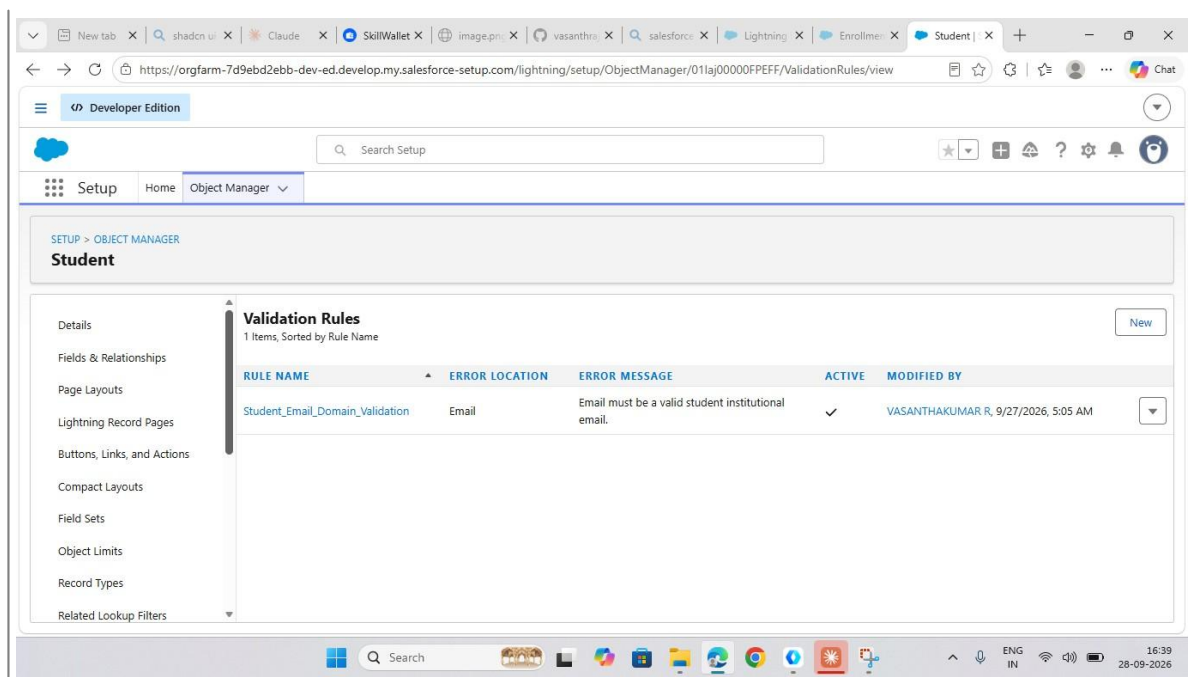

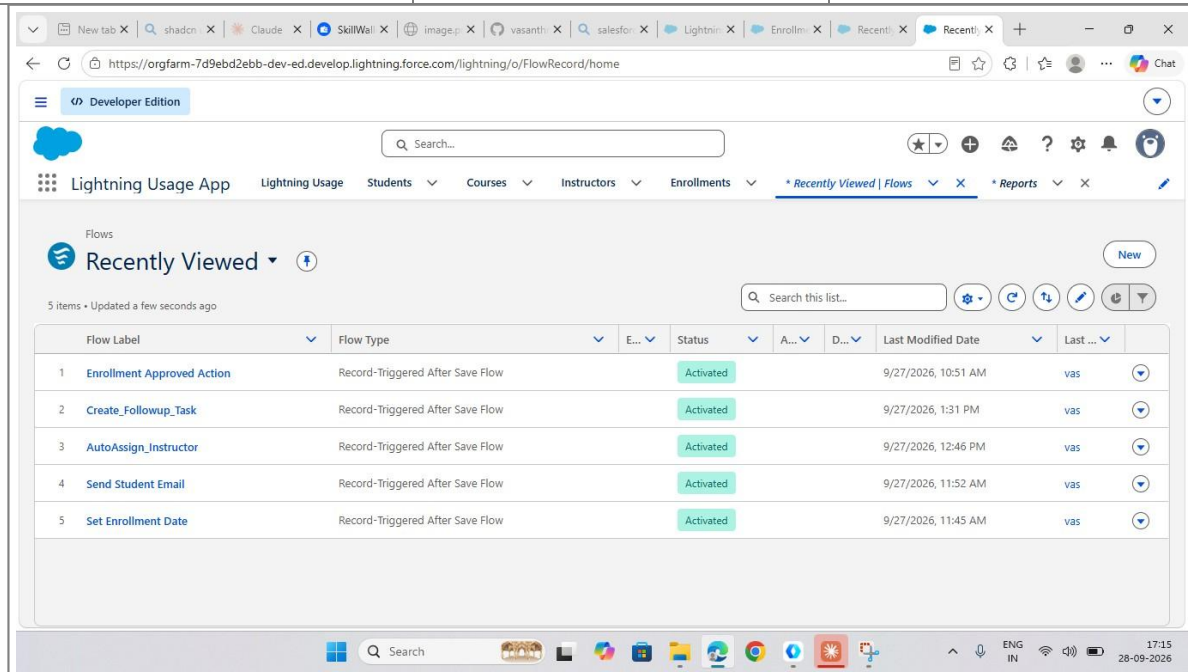

Figure 10: Active validation rule on the Student object

3.5 Flow Automation

Flow	Type	Purpose
Set Enrollment Date	Record-Triggered After Save	Sets enrollment date
Send Student Email	Record-Triggered After Save	Emails the student

AutoAssign_Instructor	Record-Triggered After Save	Assigns instructor
Create_Followup_Task	Record-Triggered After Save	Creates follow-up task
Enrollment Approved Action	Record-Triggered After Save	Actions after approval

The screenshot shows the Lightning Usage App interface. The top navigation bar includes 'Lightning Usage', 'Students', 'Courses', 'Instructors', 'Enrollments', and 'Recently Viewed | Flows'. The 'Recently Viewed | Flows' section displays a list of five activated flows. The table below represents the data shown in the screenshot.

Flow Label	Flow Type	E...	Status	A...	D...	Last Modified Date	Last ...
1 Enrollment Approved Action	Record-Triggered After Save Flow		Activated			9/27/2026, 10:51 AM	vas
2 Create_Followup_Task	Record-Triggered After Save Flow		Activated			9/27/2026, 1:31 PM	vas
3 AutoAssign_Instructor	Record-Triggered After Save Flow		Activated			9/27/2026, 12:46 PM	vas
4 Send Student Email	Record-Triggered After Save Flow		Activated			9/27/2026, 11:52 AM	vas
5 Set Enrollment Date	Record-Triggered After Save Flow		Activated			9/27/2026, 11:45 AM	vas

Figure 11: Five activated flows

3.6 Approval Process

Approval Enrollment Request sends enrollment requests to the Training Manager.

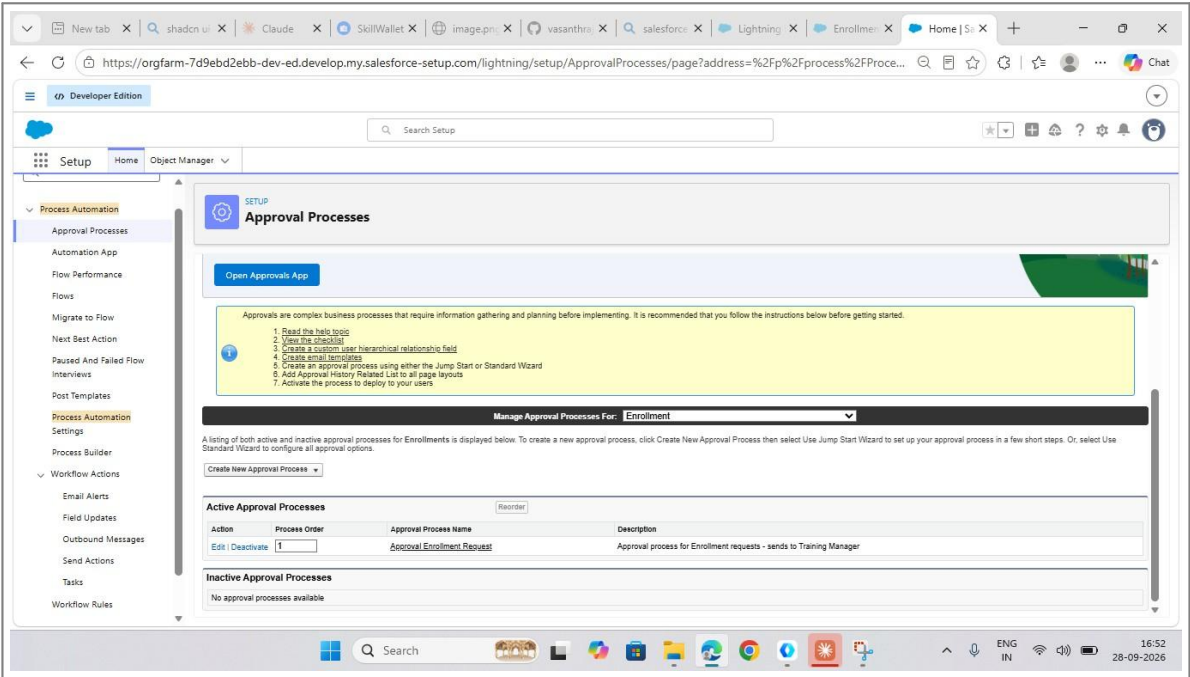

Figure 12: Approval process for the Enrollment object

3.7 Reports

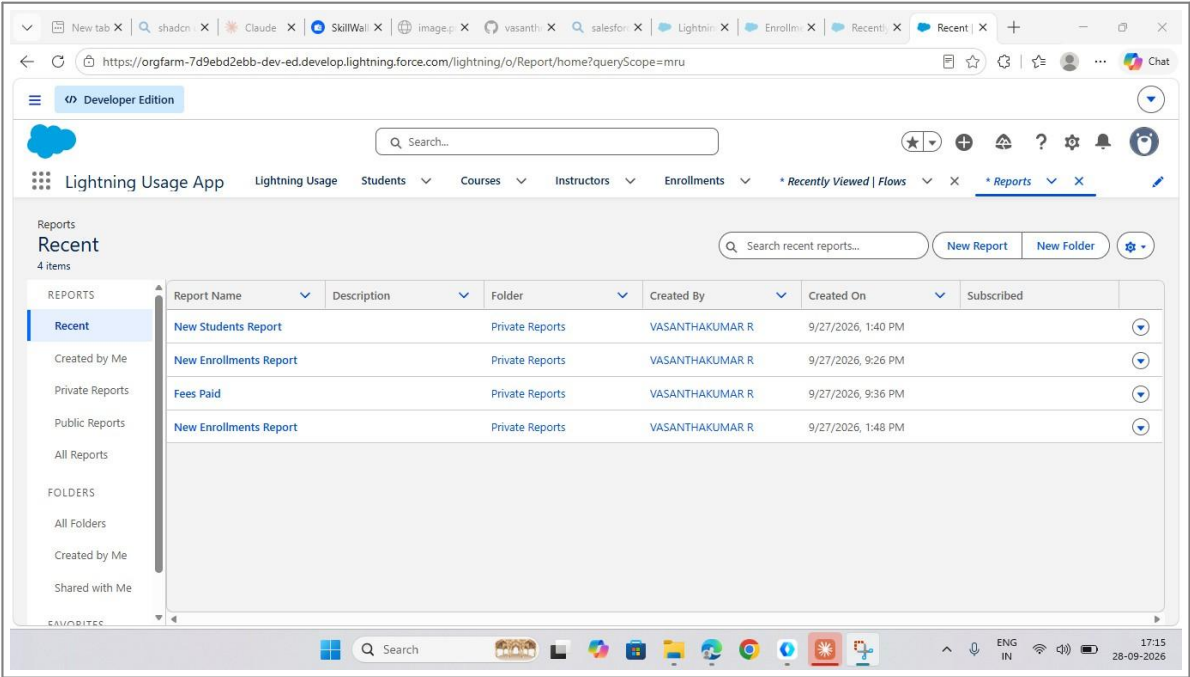

Figure 13: New Students, New Enrollments and Fees Paid reports

3.8 Dashboard

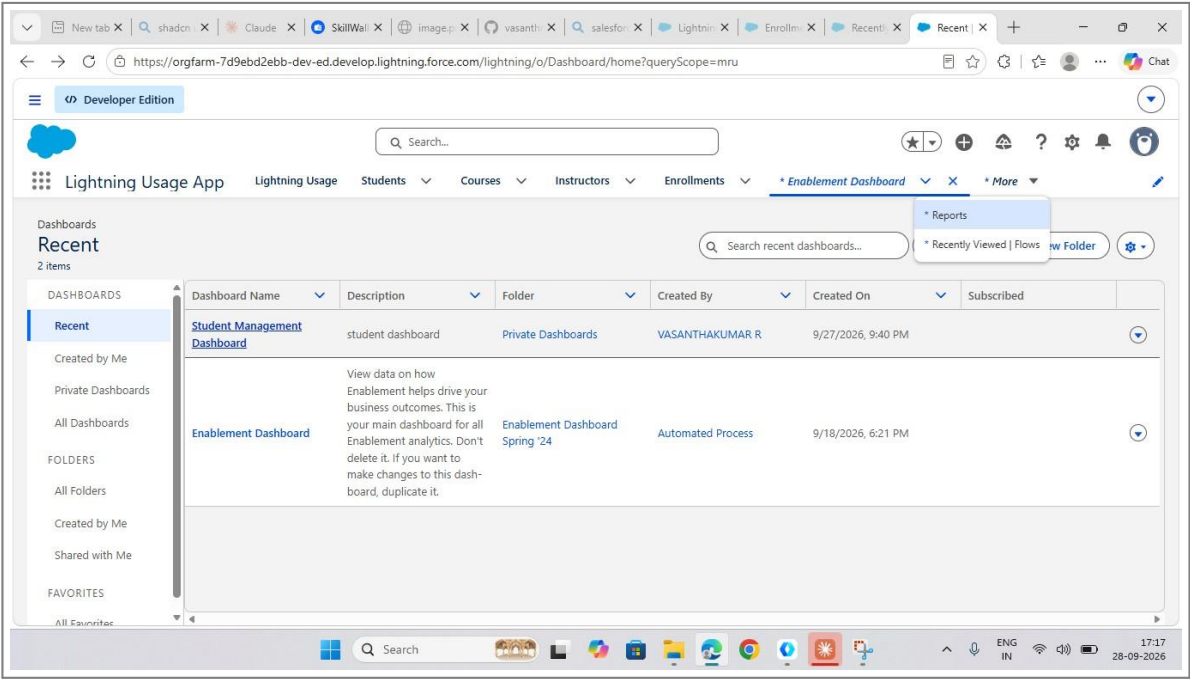

Figure 14: Student Management Dashboard

4. Summary

The SECMS application was successfully developed with custom objects, relationships, a Lightning app, validation, flow automation, an approval process, reports and a dashboard.
