

SECMS

Student Enrollment & Course Management System
Built on the Salesforce Platform

Phase 6: Project Testing - Testing Report

Project Name	SECMS
Platform	Salesforce Developer Edition (Lightning Experience)
Phase	6 of 8 - Project Testing
Testing Type	Functional / Manual Testing
Team Name / Members	Member 1: Vasanthakumar R Team Lead Member 2: Saravanan V Member 3: Syed Kutbudeen S Member 4: Raji P Member 5: Sriram S

1. Introduction

This report documents the testing of the SECMS Salesforce application. The goal was to verify that the objects, validation rules, flows, approval process, reports and dashboard built in Phase 5 behave as designed and meet the requirements defined earlier.

2. Testing Objectives

- Verify that Student, Course, Instructor and Enrollment records can be created and saved correctly.
- Confirm that validation rules block invalid data with clear error messages.
- Confirm that flow automations run after save and update the related records.
- Verify that the enrollment approval process routes requests to the Training Manager.
- Confirm that reports and the dashboard show the expected data.

3. Scope & Test Environment

Item	Details
Application	Student Enrollment (Lightning app)
Org type	Salesforce Developer Edition
Objects tested	Student, Course, Instructor, Enrollment, Payment / Fees
Automation tested	Validation Rule, 5 Record-Triggered Flows, Approval Process
Analytics tested	3 Reports, Student Management Dashboard
Browser	Microsoft Edge (Windows)
Testing method	Manual functional testing by the project team

4. Test Cases & Results

ID	Module	Test Scenario	Expected Result	Status
TC01	Student	Create a student with all required fields	Record saved successfully	Pass
TC02	Student	Create a student without a required field	Save blocked; required field error shown	Pass
TC03	Validation	Enter an email that is not an institutional email	Error: Email must be a valid student institutional email.	Pass
TC04	Validation	Enter a valid institutional email	Record saved without error	Pass
TC05	Course	Create a course with name, fee and duration	Course record saved	Pass

TC06	Instructor	Create an instructor record	Instructor record saved	Pass
TC07	Enrollment	Create an enrollment linking a Student and a Course	Enrollment saved and linked to both records	Pass
TC08	Flow	Save a new enrollment (Set Enrollment Date flow)	Enrollment date is set automatically	Pass
ID	Module	Test Scenario	Expected Result	Status
TC09	Flow	Save a new enrollment (AutoAssign_Instructor flow)	Instructor is assigned automatically	Pass
TC10	Flow	Save a new enrollment (Send Student Email flow)	Confirmation email sent to the student	Pass
TC11	Flow	Save an enrollment (Create_Followup_Task flow)	Follow-up task created	Pass
TC12	Approval	Submit an enrollment for approval	Request routed to the Training Manager	Pass
TC13	Approval	Approve the request (Enrollment Approved Action flow)	Approved action runs and status is updated	Pass
TC14	Payment	Record fee payment for an enrollment	Payment / fee status saved and shown in Fees Paid report	Pass
TC15	Reports	Open New Students, New Enrollments and Fees Paid reports	Reports open and list the correct records	Pass
TC16	Dashboard	Open Student Management Dashboard	Dashboard opens with the three report components	Pass

5. Test Evidence (Screenshots)

5.1 Application

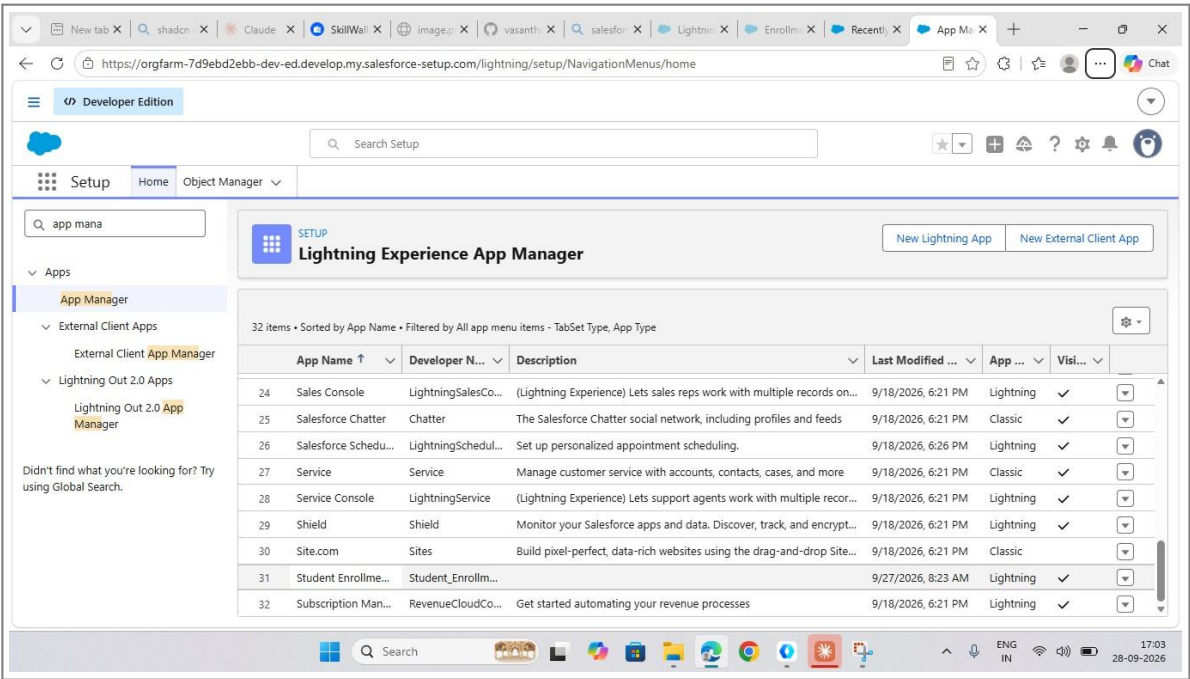

Figure 1: Student Enrollment Lightning app available in App Manager (TC01-TC07)

5.2 Validation Rule Testing

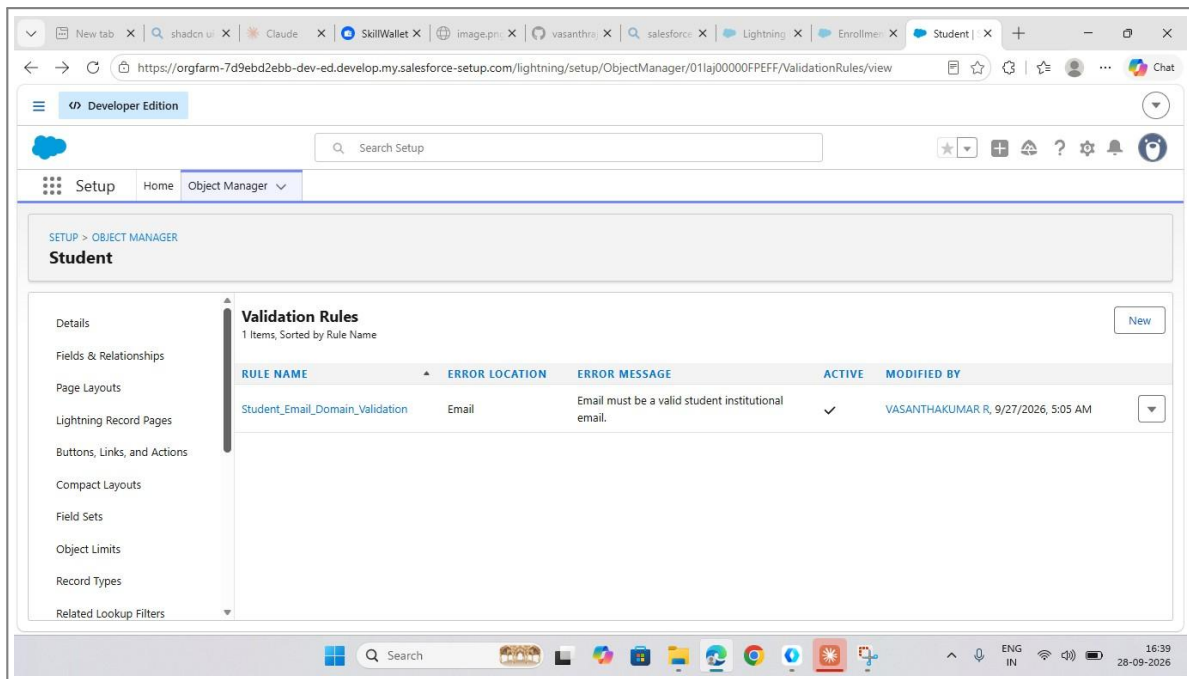

Figure 2: Student_Email_Domain_Validation - active, error shown on the Email field (TC03, TC04)

5.3 Flow Automation Testing

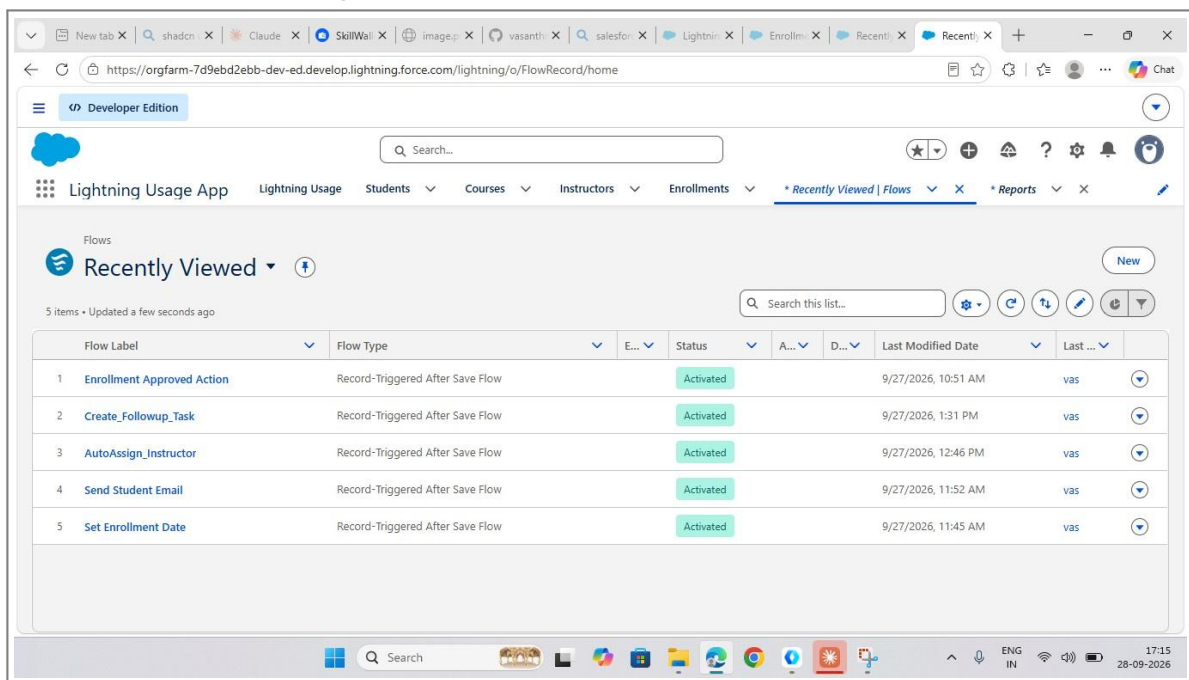

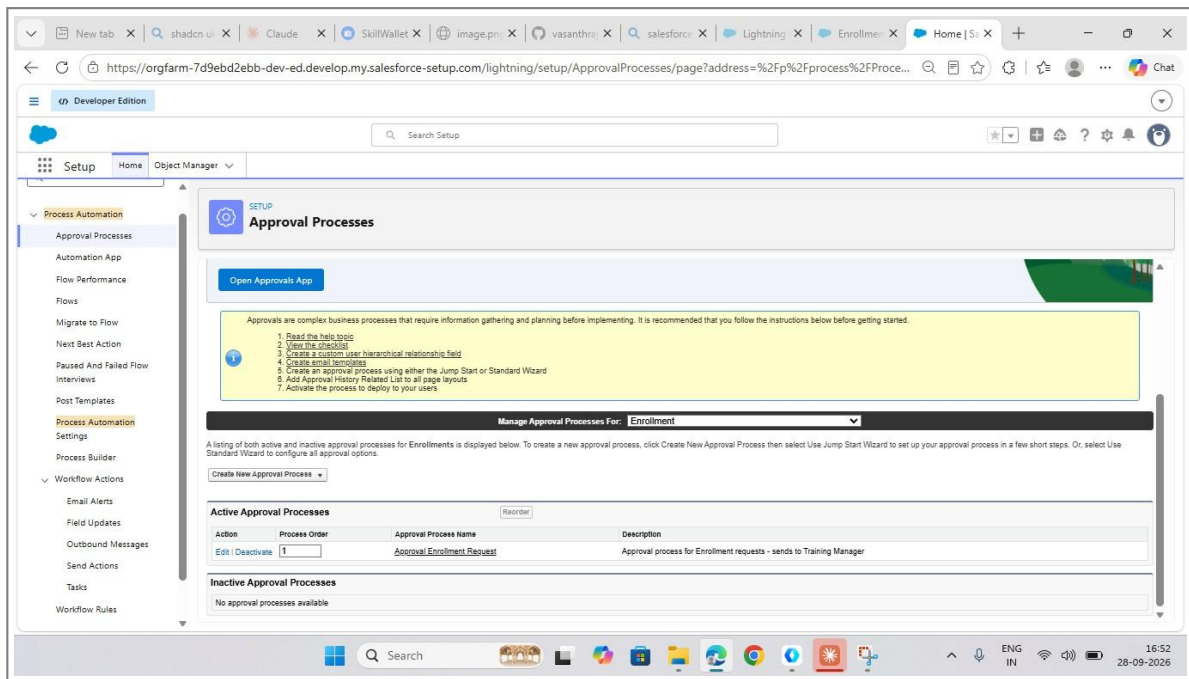

Figure 3: Five record-triggered flows in Activated status (TC08-TC11, TC13)

5.4 Approval Process Testing

Figure 4: Approval Enrollment Request - active, sends requests to Training Manager (TC12)

5.5 Reports & Dashboard Testing

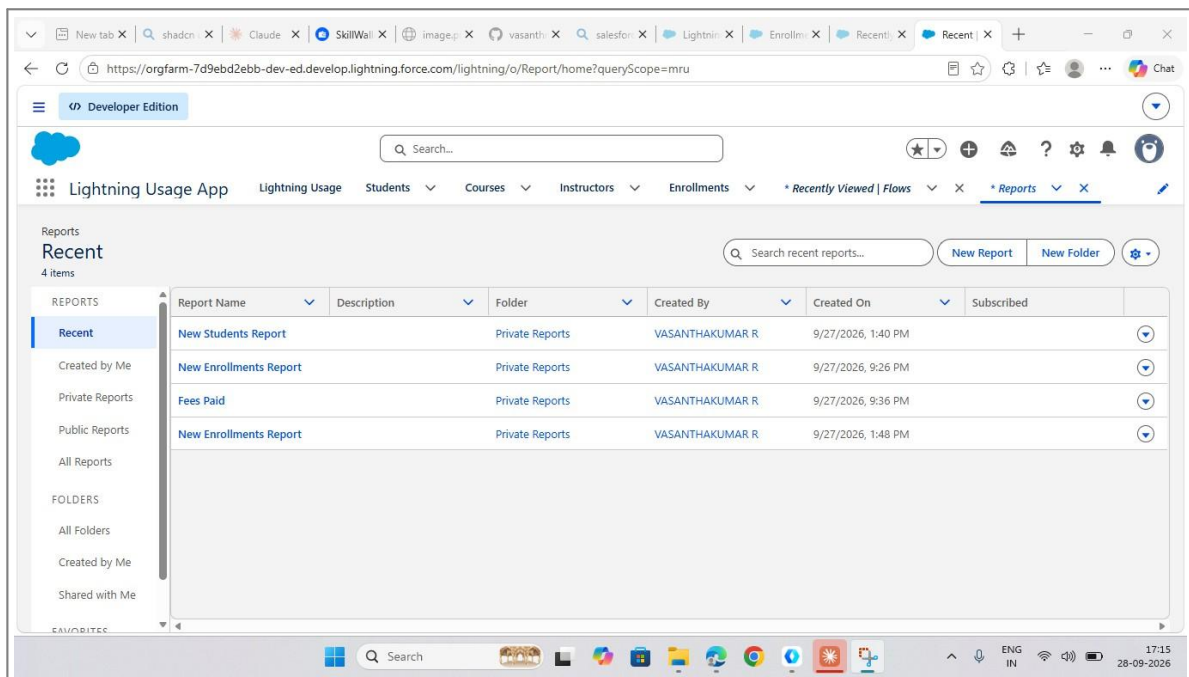

Figure 5: New Students, New Enrollments and Fees Paid reports (TC14, TC15)

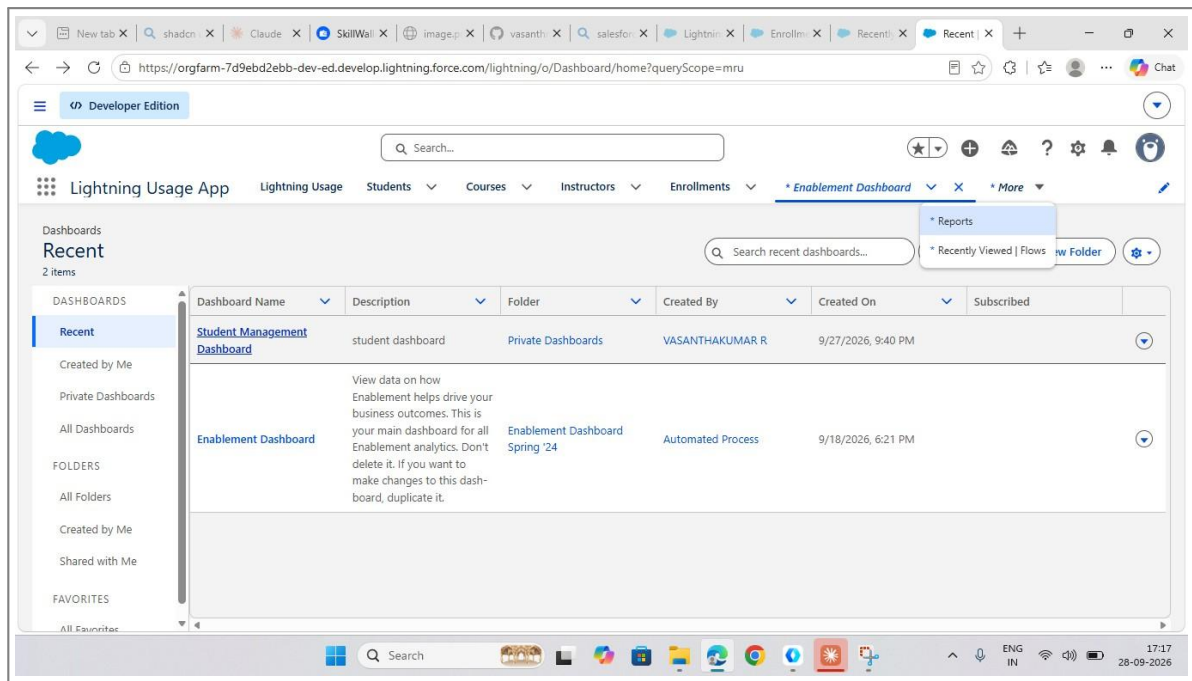

Figure 6: Student Management Dashboard listed under Dashboards (TC16)

6. Test Summary

Total Test Cases	Passed	Failed	Pass Rate
16	16	0	100%

7. Conclusion

All planned functional tests were executed and the SECMS application met the expected results. The validation rule, flows and approval process work as designed, and the reports and dashboard are available for monitoring students, enrollments and fee payments. The system is ready for final documentation and demonstration.
