

SECMS

Student Enrollment & Course Management System
Built on the Salesforce Platform

Phase 8: Project Demonstration - Demo Script

Project Name	SECMS
Platform	Salesforce Developer Edition (Lightning Experience)
Phase	8 of 8 - Project Demonstration
Estimated Demo Time	8 to 9 minutes
Presenter(s)	Member 1: Vasanthakumar R Team Lead Member 2: Saravanan V Member 3: Syed Kutbudeen S Member 4: Raji P Member 5: Sriram S
Demo Video Link	https://drive.google.com/file/d/1DeW4hdOxI9Sh518HZtBUKfwU901PX59F/view?usp=drivesdk

1. Demo Objective

To show how SECMS manages students, courses, instructors, enrollments and fee payments on Salesforce, and how validation, automation, approval, reports and the dashboard work together.

2. Before You Start (Checklist)

- Log in to the Salesforce Developer org and open the **Student Enrollment** app.
- Keep 1 sample Student, 1 Course and 1 Instructor ready.
- Close unwanted browser tabs and notifications.
- Set browser zoom so text is clearly readable; test screen recording and microphone.
- Keep the Reports and Dashboard tabs open in advance.

3. Demo Flow & Script

Time	Step	What to Show	What to Say
0:00	Introduction	Title slide or app home page	Hello, this is SECMS, a Student Enrollment and Course Management System built on Salesforce.
0:45	Problem	Talk only	Institutions manage students, courses and fees in separate sheets, which causes delay and errors. SECMS puts everything in one system.
1:30	App & Objects	Open the Student Enrollment app; show Students, Courses, Instructors and Enrollments tabs	The app has connected objects for students, courses, instructors and enrollments.
2:30	Create Student	Create a new Student record	I create a student. Salesforce saves the record with all required details.
3:15	Validation Rule	Enter a non-institutional email and click Save	If the email is not an institutional email, the validation rule blocks the save and shows a clear error message.
4:00	Enrollment	Create an Enrollment linking the Student and a Course	Now I enroll this student in a course. The enrollment is linked to both records.
4:45	Flow Automation	Show the enrollment date, assigned instructor, follow-up task and email	On save, flows automatically set the enrollment date, assign an instructor, send an email and create a follow-up task.
6:00	Approval Process	Submit the enrollment for approval; approve as Training Manager	The request goes to the Training Manager. After approval, the approved-action flow runs.
7:00	Reports	Open New Students, New Enrollments and Fees Paid reports	Reports give quick information about students, enrollments and fees paid.
8:00	Dashboard	Open Student Management Dashboard	The dashboard shows these reports in one view for administrators.

9:00	Conclusion	Talk only	SECMS reduces manual work, improves data quality and gives clear insight. Thank you.
------	------------	-----------	--

4. Key Points to Highlight

- Built with clicks, not code: objects, flows, validation, approvals, reports and dashboards.
- Five record-triggered flows automate the enrollment process.
- Approval process gives the Training Manager control over enrollments.
- 16 functional test cases passed (see Phase 6 Testing Report).

5. Possible Questions & Answers

Question	Suggested Answer
Why Salesforce?	It provides ready-made security, automation and reporting, so the solution is built quickly without custom code.
What does the validation rule do?	It blocks student emails that are not valid institutional emails.
Which automations did you build?	Set Enrollment Date, AutoAssign Instructor, Send Student Email, Create Follow-up Task and Enrollment Approved Action flows.
Who approves an enrollment?	The Training Manager, through the Approval Enrollment Request process.
What can be added in future?	A student portal, online payments, attendance and grade tracking.

6. Recording Tips

- Record at 1080p and speak slowly and clearly.
- Practice the flow once before recording.
- Upload the video to Google Drive or YouTube (unlisted), set access to *Anyone with the link*, and paste the link on the cover page.
- Keep the video under 10 minutes.
